

Project INF is looking for a student assistant

The Collaborative Research Centre 1342 analyses the global dynamics of public social policy. The CRC 1342 works as an umbrella for a total of 15 projects. One of them is the Information Management Project (**INF project**) where the research data from all CRC projects are accumulated in an information management system "Advancing the Global Welfare State Information System (**WeSIS**), eScience Services and Research Data Management". We are looking for a student employee for further development of WeSIS (up to 74 hours/month) as soon as possible, preferably with a focus on **UI/UX design** and/or **frontend development** capabilities. The salary is in accordance with the current collective agreement of the state of Bremen (12.29 Euro / hour). Send your CV and/or portfolio to: tany@uni-bremen.de

Job description:

- Gathering and preparing user requirements in collaboration with our social scientists for our existing data repository
- Designing graphic user interface elements using Figma and/or other necessary tools
- Conduct design adjustments based on user feedback
- Experience with Bootstrap, Material UI, React, JavaScript and/similar libraries would be a huge plus

Your profile:

- Ongoing studies in Computer Science, Digital Media, Interface design, or other similar subjects are welcome. In exceptional cases, a portfolio of previous work experiences is also welcome when the study programs do not match directly
- Very good knowledge and skills on UI/UX design tools and programs. We work with Figma
- Good knowledge of English is a must as we are an English-speaking team
- Knowledge of web programming languages will be a plus. We work with Ruby on Rails, JavaScript and React among others
- Strong knowledge of responsive and interactive designs with attention to details

Our offer:

- Flexible working hours with the possibility of home-office
- Connection to the team and related activities (including the opportunity to participate in team events, retreats, etc.)
- Opportunity to work with the end users to polish and tailor an existing system to their needs
- Initially with 3 months contract and later extendable based on the performance

Deadline for application:

31 March, 2024
